

## Aqua Clean's Management System awarded ISO 9001:2015 and ISO 14001:2015 certification

Friday, January 19, 2018 – 12:00

**Aqua Clean were awarded ISO 9001:2015 and ISO 14001:2015 certificates, on January 11, 2018, by the leading certification company DNV GL, fulfilling the quality and environmental standards.**

Aqua Clean Ltd, a Finnish family owned company is the largest manufacturer of industrial cleaning systems in Scandinavia.

Aqua Clean's mission is to solve the customer's total cleaning needs, by offering reliable high-quality products, both technically and functionally, and the after sales services for the entire machine's lifetime. As markets and industry develops, one key to success is to develop the organization, improve operations whilst considering quality and environmental factors. At Aqua Clean, quality and environment related activities are continuously being improved and systematically led.

"We are a leading player and an internationally recognized brand, for which we thank our customers and employees. Quality comes from customer-oriented concrete actions and excellent communication. Therefore, quality refers to everything we do, not only the product", says Mr. Frey Taxell, Managing Director of Aqua Clean Ltd.

## Quality for every customer – a 25th anniversary

Aqua Clean's activities are based on the customer, quality, safety and a responsibility for the environment. The organization has been developed so that all personnel have the means to develop quality. Quality is especially related to customer needs, a swift and flexible service, and reliable deliveries, which are being measured and followed regularly.

"One must make observations, analyse and take decisions which are put into action. Communication with customers, personnel and other stakeholders must be continuous. Our solutions are based on customer needs; many new products and features were initiated by a customer application or an employee's idea", Mr. Taxell continues.

"The purpose of quality is that we are a partner whom the customer can trust. Foremost expectations of our customers are the cleanliness quality and durability of the equipment, together with an effective aftersales service. Aqua Clean also focuses its quality approach to the technology within the equipment, which contributes to reduced running costs and increased productivity for the customer.

The personnel are the most important internal asset of any company. Success at work requires know-how and suitable characteristics. And when the company shows its appreciation to the employees, they also enjoy their work more. Important for employee satisfaction is also that the company incorporates high-quality processes and working practices", Mr. Taxell concludes.

A more detailed description of our operational policy is available on request.

Aqua Clean Ltd is the largest manufacturer of industrial cleaning systems in Scandinavia. Additionally, the company provides aftersales services. The principal industry sectors are the metalworking industry, aviation and railway. The basis of our activity is to always listen to the customer's needs and meet them.

Our staff and the members of our international distribution and service network are experts in their field, and we are present in Europe, the Americas and Asia. Our range includes single- and multi-stage versions of cabin spray cleaning systems, high flow systems, tunnel systems as well as special and custom-made systems. Our management system is a guarantor of a high quality and respect for the environment.

Aqua Clean Ltd was founded in 1993. The company has been international since the beginning, with over 80% of turnover coming from export, mainly in China, Germany, Scandinavia, the UK and the U.S. The company employs around 30 people with offices in Espoo and a factory in Pori, Finland.
